About This Game

Destroy the Luftwaffe!

There's something new in the air, and it's more than the hum of hundreds of aero engines... As the Luftwaffe launches its aerial offensive, the outnumbered Royal Air Force is scrambling to bring into combat new planes that will ensure victory over a stronger foe. Will they succeed? It's up to you, and your Hurricane or Spitfire. If you hold off the enemy long enough, you'll be the first to fly the Hawker Tornado and Westland Whirlwind into combat, and enable the Empire to strike back before Reichsmarschall Goering finishes his breakfast. You'll be rewarded with bonus missions, promotions, decorations, and a view of burning Berlin from the tail turret of a Halifax bomber. Join in the new Battle of Britain. Your aircraft is ready and waiting...

No Joystick Support??. Join the Royal Air Force in their fight against the Luftwaffe.

- + Cheap game
- + Decent story
- + Simple gameplay

- Graphics
- Short game. Disappointing as the advertisng blurd stated that players could use a joystick if they chose to, but there is no option in the game to use one! Feel a bit conned really.. Bit dissappointed with no Joystick Support
